

MAF ICIMS™

Conferences Monitor Tutorial

Monitoring, Analytics and Reporting for UC&C

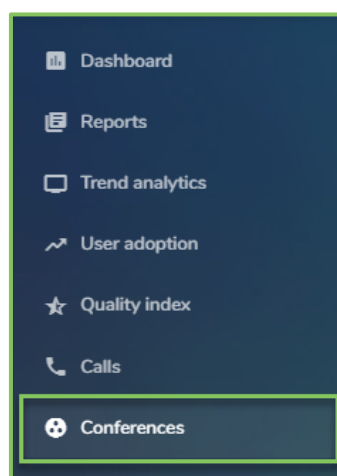

About MAF ICIMS™

MAF ICIMS™ is a monitoring and reporting tool which delivers a 360-degree view of Unified Communications usage and associated costs. Trends in the usage of voice, video, IM, conferences, file transfers and application sharing can be tracked to highlight user acceptance, performance metrics and cost savings which enables more effective use of resources. The tool is easy to use, displaying information in a simple to view format suitable for use by any employee within an organization, removing the need for any time-consuming manual processes.

Accessing the Conferences Monitor

To access the monitor, simply choose Conferences from the left side panel.

Conferences Monitor

The conferences section displays a list with all the conferences, in a detailed format for the last 7 days, by default.

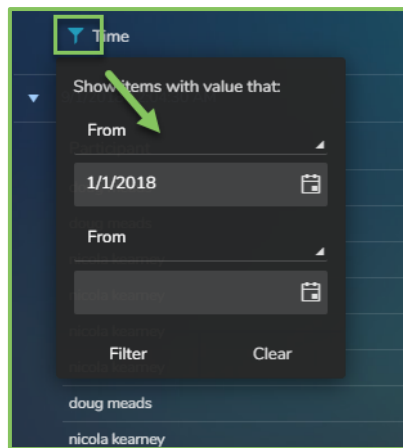

Time	Organizer	Participants	Duration
9/1/2018 12:04:30 AM	nicola.keamey@codesoftware.net	2	0:29:58

Network

Network MOS: 0.00
 Diagnostic ID: 52093
 Error category: Expected failure
 Error description: The signaling session was terminated due to a loss of network. This typically occurs when a wireless connection drops or a machine enters hibernation mode. Audio calls will typically continue if audio is still flowing. If the network dropped, the client will attempt to re-establish and send any queued instant messages once connectivity is restored.
